

Height Adjustable Steering Wheel Lithium Electric Tow Tractor With Hand Brake And Foot Brake

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: GOODSENSE
- Minimum Order Quantity: Negotiable
- Price: Negotiable
- Packaging Details: Bare packaging
- Delivery Time: 30-40work days
- Payment Terms: T/T

Product Specification

- Name: Ground Support Equipment
- Feature: Good All-round Visibility
- Place Of Origin: China
- Brand Name: Goodsense
- Condition: New
- Energy Supply: Reference Introduction
- Advantage: Safe And Stable
- Highlight: **Adjustable electric tow tractor,
Lithium baggage tow tractor,
Lithium electric tow tractor**

Product Description

Height Adjustable Steering Wheel Lithium Electric Tow Tractor With Hand Brake And Foot Brake

Transport heavy goods accurately and rapidly

The lithium electric tow tractor from GOODSENSE forklift moves heavy loads fast and securely. Its mobility and operability is key to this; because of its compact size, this electric tow tractor is very utility. The energy-saving and accurate power steering makes any operation easier, even within a small space. This increases productivity. The truck has a strong design: The inductive, one-piece chassis secures all the parts during tough heavy-duty manipulations. The cabin is enclosed. In such a way, little vibrations and road noises influence the driver. The rated capacity is 25000KG.

FEATURES

Security

The sturdy chassis and the robust cabin protect the driver while driving. At the same time, the large cabin windows provide good all-round visibility. On this tow tractor, we adopt both hand brake and foot brake to keep driver safe.

Good all-round visibility
Robust cabin and chassis

Ergonomics

The ergonomic design of the lithium electric tow tractor prevents the driver from becoming weariful and enhances comfort during longer transport journeys. This is provided by a driver's enclosed cabin, which indemnifies for unevenness on the driving surface and hinders from formidable oscillations. All the control elements are clearly arranged and easy to reach. The driver can adjust the height of the steering wheel and adapt it to their needs. The low entry height makes it easier to enter and exit the truck. The cabin is installed using a modular concept, adapted to the ergonomic needs of the user.

Height-adjustable steering wheel

Installed driver's cabin
Low entry height

Handling

The lithium electric tow tractor use powerful 30 KW electric motor, an accurately set Curtis controller with self diagnosis function and a robust heavy-duty design. This association provides continuing high drawing and transport capacities. The tractor starts up powerfully, and therefore it rapidly accomplishes its maximum driving speed. On the side, many driving operations are made easier by the small turning radius and the smooth hydraulic steering. GOODSENSE offers two truck versions with different wheelbases. Depending on the usage situation, the W20 is either more versatile or has improved directional stability.

Powerful electric motors

Rapid acceleration
Small turning circle
Hydraulic steering

Service

Service technicians can easily access all the service components. This also applies to the battery. The technician can read out central truck data using a CAN bus interface. The three-phase motor is maintenance-free. A multi-functional display in the cabin provides a lot of information.

Easy servicing access

CAN bus interface
Maintenance-free three-phase motor
Multi-functional display with maintenance information
